TO K. D. Anderson, Facilities Operations Management, Bldg. 080, X6979

FROM A. Deans, Ecology and NEPA Division, X8675

**SUBJECT** MODIFICATION TO SITE SPECIFIC HEALTH AND SAFETY PLAN (SSHSP) FOR THE  
ROCKY FLATS PLANT ECOLOGICAL MONITORING PROGRAM

**We would like to request the following modifications to the SSHSP for the Rocky Flats Plant Ecological Monitoring Program (EcMP) prepared by Walsh & Associates, Inc.**

1) pg 4, ¶2 should read as follows, changed sentences are in ~~strike-out~~:

Sampling will occur at 12 locations in the buffer zone. These sampling activities will include vegetation sampling, and shallow soil sampling for soil invertebrates and for microbial indices. The sites are located near the several IHSSs identified on the Rocky Flats Plant Site. A listing and description of the IHSS sites near the Ecological Monitoring Program sampling sites is provided in Appendix 1. A map of the locations of the IHSSs in relation to the sampling sites and access routes to these sites will be posted in the Biota Trailer (T891J) to allow field personnel to identify these areas. In addition, three or more off site locations will also be sampled for the same media and using the same methodologies as those used at the RFP, with the exception that soil trenches shall not be excavated off site. These sites are anticipated to be close to the RFP on City of Boulder Open Space land. When sites have been selected, a map of their locations shall be provided to all applicable personnel.

2) pg.4, ¶4

Delete this paragraph which refers to a map of trenching locations. The map is not provided.

3) pg. 17, ¶5

Delete reference to taping shirt sleeves and pant leg cuffs. The use of insect repellent is sufficient protection against ticks and poisonous spiders.
